

ESTIMATED TRAFFIC GROWTH

- Current and projected traffic is modeled by the Chicago Metropolitan Agency for Planning (CMAP).
- CMAP is the regional planning organization for northeastern Illinois.
- The project team is required to use forecasts from CMAP to plan for growth in population, households, and employment.
- The study area has seen considerable growth in recent years. Population and employment is expected to grow by 20% through 2050.

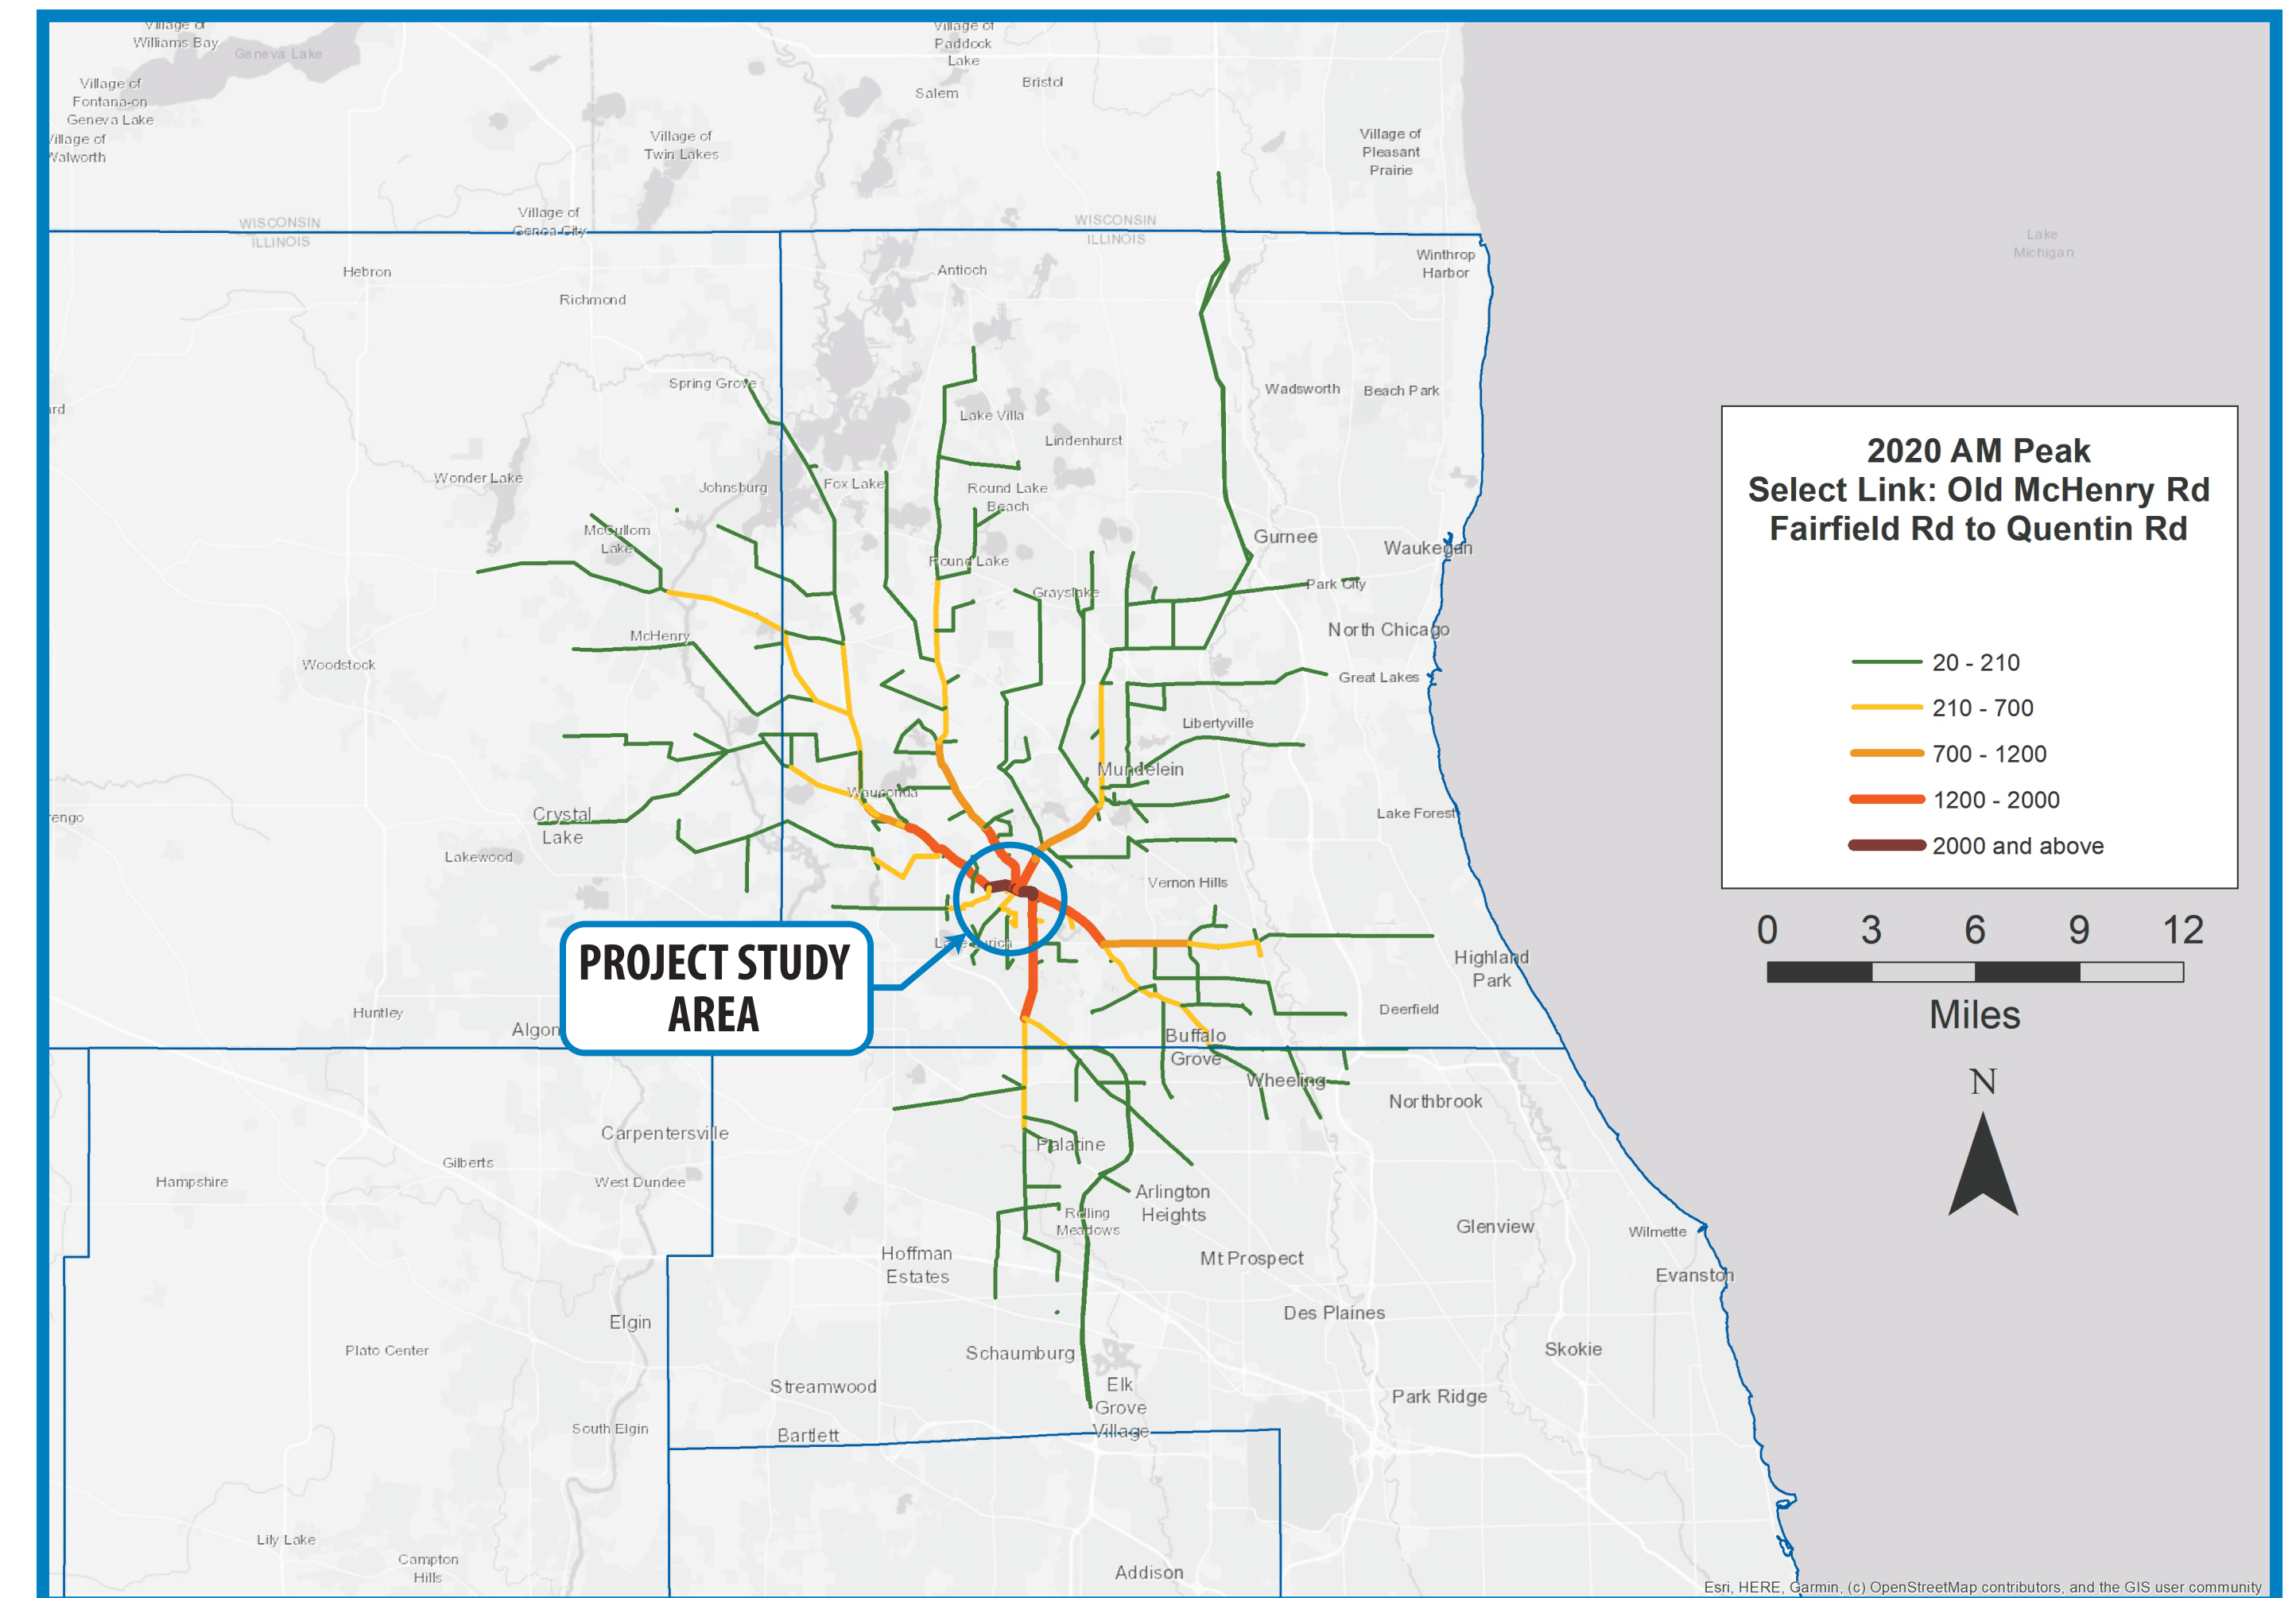

Future regional traffic models are shown in the CMAP On To 2050 Plan:
